Certification matters! To meet the demands of the rapidly expanding field of infection prevention, and equip professionals for the challenges of the future, APIC has created the infection preventionist (IP) competency model. The model outlines the skills needed to advance the infection prevention field and was created to help direct the IP's professional development at all career stages.

API 16C covers flexible choke and kill lines and API 16C-licensed facilities for flexible choke and kill lines are currently limited to six facilities, only one of which is in the United States. With limited manufacture options for API 16C hoses, deliveries take a long time and pricing is very high.
