### Beef Feedlot Management Guide Usaid

Feedlot management influences cattle performance through its affect on feed intake, weight gain and herd health. Feedlot margins are often marginal. This reinforces the value of checking the economics, securing contracts and selecting cattle which perform well and consistently meeting market specifications.

### Managing beef cattle feedlots - FutureBeef

The USDA Feeder Cattle Grading System or any other system you use is a method of sorting cattle. Ideally, cattle should be sorted into similar types and sizes for a uniform nutrition program for all the animals in a pen. A certain amount of sorting may still need to be done when cattle arrive at the

feedlot.
