Attach your vacuum gauge and start your vehicle's engine. Allow your car to idle for a couple of minutes. Your gauge should read between 14 and 18 inches of vacuum. If the reading is low or non-existent, there's a blockage or leak in the vacuum line. Visually check the entire length of the hose for the problem.

## **How to Check Engine Vacuum Hoses: 4 Steps (with Pictures)**

Vacuum functions as a fundamental dynamic air flow of the internal combustion engine. Without the proper vacuum, a car would starve of the air and fuel mixture required to produce combustion. Vacuum is the difference in pressure, usually measured in inches of mercury, between the interior of the intake manifold and the outside air pressure.
