APP1 CHAPTER 7: ROTATIONAL MOTION 20 JANUARY 2020 MR. GUNDLACH 7.1 Describing Circular and Rotational Motion The motion of objects that spin about an axis is defined as rotational motion. To describe the motion of a particle as it moves in a circle, it is convenient to use the angle from the positive x-axis to describe the particle's rotation. Because the particle travels in  $\theta$  a circle with ...
