Since the E4OD is an electronically controlled transmission, reprogramming the transmission can provide improved operation and reduce gear hunting by adjusting the line pressure, torque converter lock-up point. Aftermarket companies offer standalone user-adjustable programming modules for the E4OD.

Recommended Upgrades for a Ford E4OD | It Still Runs

The torque converter housing is mechanically attached to the engine's crankshaft causing the pump to operate whenever the engine is running. It's why a worn or faulty pump makes a whining noise in all gears, including park and neutral. A restricted or clogged transmission filter makes the same whining noise as a faulty transmission pump.

Symptoms of a Transmission Oil Pump / Torque Converter ...

E4OD are notorious for front pump failure, and front pump bushing failure. This causes fluid to blow out front seal.... It wouldn't hurt to check codes, if transmission seemed to be working strong, you may get by dropping trans, and pull the torque conv., the front pump pulls right out the front of the trans, and take it to a shop and have it checked.

How to Install a Torque Converter on a Ford 4R100/E4OD ...

Figure 8 shows a cross section of a typical torque converter with pump and shows the path converter oil can take from inside the converter through the pump bushing to exhaust. Excessive converter oil flow past the converter hub bushing contributes to front seal leaks and allows converter oil pressure a direct path to exhaust.
