## **User Guide Openssl - orrisrestaurant.com**

OpenSSL 1.0.2 supported the use of the OpenSSL FIPS Object Module (FOM), which was built to deliver FIPS approved algorithms in a FIPS 140-2 validated environment. [22] [23] OpenSSL controversially decided to categorize the 1.0.2 architecture as 'End of Life' or 'EOL', effective December 31, 2019, despite objections that it was the only version ...
