The doctoral student at UC-Davis finds one flaw in the fruit's anti-aging powers. Apparently, too much mango is not a good thing. "Women who ate a cup and a half of mangoes for the same periods of time saw an increase in wrinkles. This shows that while some mango may be good for skin health, too much of it may not be," Fam said.

Women who eat more mango may have fewer wrinkles, study shows

Mangos are native to south Asia and is the national fruit of India, Pakistan, and the Philippines. Since the mango leaves are considered toxic and can kill cattle or other grazing livestock, mango growers and livestock owners need to be mindful about not locating grazing areas near mango groves and not feed production discards to animals.
