Myelogram Lumbar Manual Guide

A lumbar myelogram procedure is a full day procedure as far as the patient is concerned. The lumbar myelogram procedure will begin in the morning and the patient will be allowed to return home only at night as long as there are no lumbar myelogram side effects. During a lumbar myelogram, the patient will be made to lie down and the area will be numbed using some numbing agent. A thick needle will then be inserted into the spinal cord and some spinal fluid will be removed for analysis.
