As I mentally review what happens in "The Skeleton Key," I think there may be a couple of loopholes, but to describe them would betray too much of the plot, which depends on a series of escalating surprises. Besides, a movie that goes to this much trouble to work out its cosmology must have the answers. I must have missed something.

## **The Skeleton Key movie review (2005) | Roger Ebert**

There are two, primary divisions of the skeletal system: the axial skeleton and the appendicular skeleton. The primary purpose of the human skeletal system is to provide locomotion, support and protection for the body. Vital organs, such as the brain, heart, and lungs, are protected by the skeletal system. In addition to locomotion, support, and protection, the skeletal system also produces red blood cells, and stores important minerals for the body.
