Qualitative Discourse Analysis in the Social Sciences by ...

Qualitative research often focuses on what people say: be that in interviews, focus-groups, diaries, social media or documents. Qualitative researchers often try to understand the world by listening to how people talk, but it can be really revealing to look at not just what people say, but how. Essentially this is the how discourse analysis (DA) can be used to examine qualitative data.

Introducing Discourse Analysis for Qualitative Research ...

Discourse analysis is a research method for studying written or spoken language in relation to its social context. It aims to understand how language is used in real life situations. Discourse analysis is a common qualitative research method in many humanities and social science disciplines, including linguistics, sociology, anthropology, psychology and cultural studies.

Discourse Analysis | A Step-by-Step Guide with Examples

What is discourse analysis? Discourse analysis is about studying and analysing the uses of language. Because the term is used in many different ways, we have simplified approaches to discourse analysis into three clusters (table 1) and illustrated how each of these approaches might be used to study a single domain: doctor-patient communica
