Oracle Solaris integrates software-defined networking and built-in virtualization with a proven enterprise-class operating system to provide an efficient, secure and compliant, simple, open, and affordable solution for deploying your enterprise-grade clouds. Oracle Solaris 11.4 Information Library

Operating Systems Documentation - Oracle Solaris Documentation

By default, Oracle Solaris 11 configures root as a role (rather than as a user) that is entitled to perform privileged tasks. Having root as a role enhances security since an individual user must first log in and assume the root role; thus every privileged action can be directly attributed to a named user and is logged accordingly.

Basic Operations for Oracle Solaris 11 Administration
