Malthusianism is the idea that population growth is potentially exponential while the growth of the food supply or other resources is linear, which eventually reduces living standards to the point of triggering a population die off. It derives from the political and economic thought of the Reverend Thomas Robert Malthus, as laid out in his 1798 writings, *An Essay on the Principle of Population*.

Classical economics, English school of economic thought that originated during the late 18th century with Adam Smith and that reached maturity in the works of David Ricardo and John Stuart Mill. The theories of the classical school, which dominated economic thinking in Great Britain until about 1870, focused on economic growth and economic freedom, stressing laissez-faire ideas and free competition.

Classical economics | Britannica

Analysis of the process of economic growth was a central feature of the work of the English classical economists, as represented chiefly by Adam Smith, Thomas Malthus and David Ricardo. Despite the speculations of others before them, they must be regarded as the main precursors of modern growth theory.

THE CLASSICAL THEORY OF ECONOMIC GROWTH

Back then we suffered 9 consecutive quarters of negative growth from 1983 to 1985 – but nowhere in the vicinity of 16.5% in a single quarter. In fact, you might say we haven't seen a collapse

[ANALYSIS] End of growth: How the pandemic ruined PH

...

[Prof. David Blanchflower] At best you could say there is no growth in the economy. There are puzzling issues and data about the labor market- output has been negative for five of the last seven quarters. It looks like no growth or likelihood of growth within it- and the temporary stimulus from the Olympics will wear off pretty quickly.
