If you want to learn about animals that don't live in southeast Michigan, you can go to the Animal Diversity Web. Mammals, birds, reptiles, amphibians, and fish are all vertebrates - they have a "spinal column" made up of many bones. While vertebrates are more familiar to most people, there are many, many more species of invertebrates. In Michigan alone there are over 20,000 species, mostly insects, but also snails, clams, worms, arachnids, crustaceans, and other creatures.
